Initial Model Training Code, Model Validation and Evaluation Report

The initial model training code will be showcased in the future through a screenshot. The model validation and evaluation report will include a summary and training and validation performance metrics for multiple models, presented through respective screenshots.

Initial Model Training Code (5 marks):

```
# load vgg16 model
model = VGG16()
# restructure the model
model = Model([Inputs-model.inputs, outputs=model.layers[-2].output])
# summary
print(model.summary())
```

Model Validation and Evaluation Report (5 marks):

Model	Summary	Training and Validation Performance Metrics
InceptionV3	<p>Inception v3 is a highly efficient and accurate convolutional neural network (CNN) architecture, widely used for image classification and feature extraction tasks. Developed as part of the Google Inception series, it improves computational efficiency while maintaining high performance.</p> <p>Factorized Convolutions: Breaks down large convolutions into smaller, more efficient ones, reducing computation time and improving performance.</p> <p>Auxiliary Classifiers: Incorporates auxiliary outputs during training to improve gradient flow and prevent overfitting.</p> <p>Batch Normalization: Normalizes input data across layers to accelerate convergence and stabilize training.</p>	 <pre> + train the model epochs = 20 batch size = 32 steps = len(train) // batch_size for i in range(epochs): # create data generator generator = data_generator(train, mapping, features, tokenizer, max_length, vocab_size, batch_size) # fit for one epoch model.fit(generator, epochs=1, steps_per_epoch=steps, verbose=1) 20/20 [=====] - 5s 25ms/step - loss: 3.965 20/20 [=====] - 5s 25ms/step - loss: 3.582 20/20 [=====] - 5s 25ms/step - loss: 3.277 20/20 [=====] - 5s 25ms/step - loss: 3.070 20/20 [=====] - 5s 25ms/step - loss: 2.938 20/20 [=====] - 5s 24ms/step - loss: 2.802 20/20 [=====] - 5s 25ms/step - loss: 2.725 20/20 [=====] - 5s 24ms/step - loss: 2.654 20/20 [=====] - 5s 24ms/step - loss: 2.582 20/20 [=====] - 5s 24ms/step - loss: 2.503 20/20 [=====] - 5s 25ms/step - loss: 2.473 20/20 [=====] - 5s 24ms/step - loss: 2.471 20/20 [=====] - 5s 25ms/step - loss: 2.370 20/20 [=====] - 5s 24ms/step - loss: 2.339 20/20 [=====] - 5s 25ms/step - loss: 2.294 20/20 [=====] - 5s 24ms/step - loss: 2.268 20/20 [=====] - 5s 25ms/step - loss: 2.229 20/20 [=====] - 5s 25ms/step - loss: 2.195 20/20 [=====] - 5s 25ms/step - loss: 2.170 20/20 [=====] - 5s 24ms/step - loss: 2.144 </pre>
